EDUCATION

B.E. in Information Technology

Expected 2027

Shah & Anchor Kutchhi Engineering College (SAKEC)

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, React Router, Zustand, Responsive UI

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MongoDB Atlas, MySQL

Programming / ML: Python, C, Java, Machine Learning, Natural Language Processing, Data Analysis

Tools & Deployment: Git, GitHub, Vercel, Render, Postman, Streamlit

PROJECTS

ReLoop — Intelligent Recommerce Marketplace | reloop-plum.vercel.app

React.js, TypeScript, React Router, Zustand, Node.js, Express.js, MongoDB Atlas, JWT

- Developed a responsive React.js and TypeScript frontend with reusable components for product browsing, search, and category navigation.
- Implemented JWT authentication and protected routes, and integrated REST APIs connecting the React frontend to a Node.js/Express backend.
- Managed frontend state with Zustand and connected the application to a MongoDB Atlas database; deployed the frontend and backend using Vercel and Render.

UpSkillr — Full-Stack Learning Platform | upskillr-omega.vercel.app

React.js, JavaScript, Node.js, Express.js, MongoDB, JWT, REST APIs

- Built a React.js frontend for a full-stack learning platform, implementing role-based access control and reusable UI components for course management.
- Integrated REST APIs and JWT authentication to connect the frontend with a Node.js/Express backend and MongoDB database.
- Connected backend certificate-generation and email functionality to the frontend to support course-completion workflows.

Todsy — Task Management Web Application | todoreact-coral.vercel.app

React.js, JavaScript, CSS, Node.js, Express.js, MongoDB Atlas, REST APIs

- Developed a responsive React.js task management interface with theme switching, search, filtering, and sorting functionality.
- Implemented CRUD operations and frontend state management, integrating REST APIs with a Node.js/Express backend.
- Connected the application to MongoDB Atlas for persistent storage of tasks, priorities, due dates, and categories.

Additional Projects — Data & Machine Learning

FraudShield — Fraud Monitoring Dashboard (Python, Random Forest, Streamlit): Built a fraud classification model using Random Forest, including data preprocessing, exploratory data analysis, and model evaluation, visualized through an interactive Streamlit dashboard.

ATS Resume Matcher (Python, Flask, TF-IDF, spaCy): Developed a Flask web application that matches resumes to job descriptions using TF-IDF vectorization, cosine similarity, and spaCy-based text preprocessing.

RELEVANT COURSEWORK

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Development, Machine Learning, Natural Language Processing, Software Engineering

CERTIFICATES

MERN Stack Development — Full-stack web development, RESTful APIs, MongoDB, Express, React, and Node.js.

Machine Learning Programming — Data preprocessing, model development, and practical implementation of algorithms.

Power BI for Beginners — Data visualization, dashboard creation, and data analysis using Power BI tools.

Essentials in Python — Certificate of Completion in Python Programming from Cisco — problem-solving, data handling, and foundational programming concepts.

Java Programming — Object-oriented programming, problem-solving, and application development.
